PROFILE

Senior Product Designer with 6 years of experience across B2B, B2C and enterprise products. End-to-end across discovery, research, complex workflows, polished UI, design systems and delivery. Recent focus on enterprise SaaS and AI-powered products, with hands-on collaboration with Engineering and growing involvement in production implementation through AI-assisted coding.

EXPERIENCE

Senior Product Designer · MSD

Oct 2025 – Present

- Own end-to-end design of enterprise products, from discovery and workflow definition through UI, validation and delivery.
- Design data-heavy B2B experiences involving role-based access, permissions, integrations and multiple user types.
- Shape AI-powered experiences combining enterprise knowledge, connected data sources and conversational interfaces.
- Translate ambiguous business and technical requirements into clear information architecture and scalable interaction patterns; collaborate with Engineering through implementation and production releases using VS Code, Codex and Claude Code.

Product Designer · QUBIX

May 2025 – Apr 2026
Part-time

- Led UX/UI redesigns for consumer and business products, including a high-traffic mobile application and retail/POS workflows.
- Combined stakeholder interviews, product analysis and prototyping with production-ready UI, reusable components and direct developer collaboration.

Product Designer · IGUANA

Oct 2022 – May 2025

- Designed SaaS platforms, marketplaces, CRM, booking and management products across B2B and B2C environments.
- Worked across discovery, UX architecture, interaction and visual design, research, usability testing and product audits.
- Created scalable design systems and reusable component libraries while partnering closely with Product Managers and Engineers.

EARLIER EXPERIENCE

Lead UX/UI & Product Designer · BlockCzech

Apr 2023 – Jun 2024
Part-time

Led product design for Web3 and fintech products from concept to launch; defined flows, visual direction and design-system foundations, and ran UX audits.

UX/UI Designer · Lyte

May 2022 – Aug 2022
Part-time

Designed ticketing product features, advertising-integrated experiences and partner landing pages, using product analytics to support iteration.

UX/UI Designer · Etheric

Sep 2020 – May 2022

Designed fintech and crypto products across desktop and mobile, including onboarding and investment flows; built prototypes, production UI and early design systems.

CORE EXPERTISE
